    Map data after object module synopsis:
                                                            10
                                                                 00:00:00.21
                                                                                  00:00:00.82
                                                                 00:00:00.02
    Symbol table output:
                                                                                  00:00:00.80
Total run values:
                                                           310
                                                                 00:00:02.64
                                                                                  00:00:28.47
Using a working set limited to 1050 pages and 66 pages of data storage (excluding image)
Total number object records read (both passes):
    of which 155 were in libraries and 2 were DEBUG data records containing 133 bytes
Number of modules extracted explicitly
    with 4 extracted to resolve undefined symbols
6 library searches were for symbols not in the library searched
A total of O global symbol table records was written
